THE BRITISH COLONIST.

Monday Morning, Feb. 10, 1868.

BIRTHS.

In this city, February 8th, the wife of James Hutchison, of a son.
On the 21st January, at Glenhart, near Clinton, B.C., the wife of W. H. McKay, Esq., of a daughter.

By Electric Telegraph

SPECIAL TO THE DAILY BRITISH COLONIST.

LAST NIGHT'S DESPATCHES.

Eastern States.

RICHMOND, Feb 6—Convention has adopted the clause requiring the Governor to be a citizen of the country for ten years and of State of Virginia for three years. An amendment declaring ineligible to the office any person who aided rebellion was defeated by a decided majority.

RALEIGH, Feb 6—The Convention passed a resolution requesting Gen Canby to issue orders prohibiting the sale and sacrifice of property under execution.

TALLAHASSEE, Feb 6—Convention completed the constitution and will adjourn to-morrow.

Europe.

Advices from Crete state that the Turks acknowledge that Ali Pacha has entirely failed in his mission. Many leading Turks are beginning to favor annexation to Greece. Seven more provinces have voted in favor of annexation to Greece. The Cretans have declared themselves by a majority of 29,000 free from the Sultan and in favor of Crete forming a part of the dominion of the King of Greece.

PARIS, Feb 4—The debate on regulating the press is continued. Minister Ronber made a speech urging the passage of the law. He said he was unwilling to oppose the bill, but the Empire and people alike demand some restraint on the press. The clause in the bill abolishing the preliminary license to publish was adopted by an unanimous vote.

It is reported that the Pope is willing to resume negotiations with Austria for reviving the Concordat.

LONDON, Feb 4—The last despatches from Abyssinia represent the prospects of the expedition as favorable. The army was well supplied.

No marine disasters are reported from the late storm.

It is reported that the Italian Finance Minister will place forty million livres of the Italian loan to be negotiated in this market.

CORK, Feb 4—One of the gates of the city was undermined last night and blown up; at the same time all the telegraph lines in the city were cut. The prompt action of the police prevented further demonstration. Several arrests have been made.

FLORENCE, Feb 4—The Nai Vaini asserts that no negotiations are pending for a new convention between France and Italy. Menabrea prefers the September treaty. Garibaldi has written an eloquent and enthusiastic letter to Admiral Faragut. He congratulates him on encouraging by the presence of an American fleet the national aspirations of Italy.

WASHINGTON, Feb 7—The new British Minister was presented to-day. Seward refused to allow the reporters to be present. The President said the people of the United States will believe Her Majesty entirely sincere in the kindly message which under her command has been delivered, and this belief will encourage them to hope for the speedy and amicable adjustment of the matters in difference between the two Governments.

LONDON, Feb 7—Later advices from the British expedition to Abyssinia are very discouraging and forbid the hope of a successful or safe move this season.

Canada.

MONTREAL, Feb 4—It is reported that a crisis is imminent in the Dominion Cabinet. Places will be offered Mr Howe and other Nova Scotian leaders.

A telegram from the Mayor of Halifax says great want prevails among the fishermen.

GERMANIA SING VEREIN.—At the half yearly meeting of this prosperous society, the following officers were elected: J. L. Jungerman, President; Louis Vigilie, Vice-President; H. F. Heiserman, Secretary; W. Lohse, (re-elected) Treasurer; A. Hartnagel, Bibliothecar. On the 21st inst., a soiree will be given at Sing Verein Hall.

A HUMOROUS STORY is related at the expense of a certain official 'high up' at New Westminster. It is said that he had owed a bill at the store of a merchant there for a long time. Persuasion and threats were alternately tried with no avail. The reply from the great man to the dun was invariably 'call again.' Out of all patience at last, on the 1st inst., the firm hit upon a plan to secure payment. They directed their man to proceed to the office, present the bill and remain there until the account was paid. The man, judging from past experience in the same quarter, naturally supposed he would have to wait some days; so on the way to the Camp he purchased one of those long French rolls and a piece of beefsteak. Arrived at the office, the bill was presented and the usual response given, whereupon the young man coolly drew a chair to the fire-place, opened his Inverness cape, took the French roll and laid it across his knee, then unfolding the paper in which was the steak made a motion as if about to throw it upon the coals.

'What—what are you doing there, sir?' thundered the astonished official, who had watched the preparations for a square meal with unfeigned surprise—'What do you mean, sir?' 'Nothing, sir; I'm only going to cook my lunch.' 'Why, you impudent varlet, do you take this office for a cook-shop?' 'Not at all, sir,' meekly replied the dun, 'but you see, sir, I'm acting under orders from my employers—who are very particular men, sir—not to return without the money; and as it seems, sir, I shall have to wait some time. I thought you wouldn't object if I just cooked this bit of steak on the coals while I'm waiting on your convenience, sir. You won't, will you sir, be angry if I do?' and, suiting the action to the word, the young scamp made another motion as though about to carry out his intention. 'Here I stop that!' vociferated the gentleman. 'None of that. We 'cook' laws, not steaks, here. Give me the bill and here's the money. Clear out, now, with your trash, and tell your employer that they won't be troubled with any more of my custom so long as they employ such impudent rascals to collect for them as you.' Exit young man with the roll and steak, chucking the money in his pocket and whistling 'You can't come the gammon over me, old man.'

DENIES THE SOFT IMPRACHMENT.—The honorable (?) editor of the *Columbian* denies that he is the author of the "Argus" letters, and says that they are too clever for his mental capacity to produce. This is very strange. The same low, illbred, vulgar *Sunday Varieties* vein which the honorable (?) gentleman so much affects in the leading articles of the *Columbian*, runs through the "Argus" letters from end to end. Can it be possible that in the hamlet of New Westminster two persons can be found so lost to shame and abandoned by grace as to contribute such choice specimens of blackguardism as semi-weekly appear in the *Columbian*? Impossible! One community is too small to harbor a brace of such reptiles. "Argus" and the *Columbian* editor are identical. Won't the Chief Commissioner of Lands and Works place a small pecuniary consideration in the fellow's way and secure himself from similar attacks in the future?

MECHANICS' INSTITUTE.—The third popular entertainment will take place this evening, at the rooms of the Institute, commencing at 8 o'clock, when the following interesting programme will be submitted:

1. Opening Address.
2. Piano piece—Digby Palmer.
3. Dust—Flow Gently.
4. Reading—Mr Clarke.
5. Twas with a Lowly Fisherman—Mr White.
6. Recitation—Lines addressed to the party on the track of Dr Leichard—W. K. Bull.
7. Song—Take a bumper and try.
8. Reading—Much ado about nothing—Lumley Franklin.
9. Duet—All's well.
10. Recitation—Night amongst the Spirits—W. K. Bull.
11. Song—The Englishman.
12. Volunteer song—National Anthem.

THE SIR JAMES DOUGLAS arrived from Nanaimo on Friday evening at 10 o'clock. She had a very rough passage, the wind blowing a gale from the northeast. The ice had broken up in Nanaimo harbor, but Capt. Clark thinks the last cold snap will close it up again. A concert was held at Nanaimo on Thursday evening last for the benefit of the school and about \$150 realized from the proceeds thereof. The ship Liverpool is taking in a cargo of coal for San Francisco.

THE OBJECT.—Mr Brady, a respectable resident of Lillicoet, a short time ago, received a copy of a memorial to the Governor asking for the removal of Mr Trutch. Accompanying the memorial was a letter stating that the object of the petition was to "retain the Assay Office at New Westminster by ascertaining Mr Trutch!" That's the little game, is it?

WILL THE NEWS kindly inform its readers which "action" it favors—Confederation, Annexation or Ruination? The editor possesses the gift of throwing an impenetrable veil over his views by advancing one set of ideas at the commencement of an article and advocating another at its close. His readers naturally want to know where he stands.

PURGE OUT THE MORBID HUMORS of the blood, by a dose or two of AYER'S PILLS, and you will have clearer heads as well as bodies.

The Governor has not yet intimated the day on which he will call the Council together. He has "made no sign."

Revelations of the Italian Green Book
—The Roman Question.

The publication of the Italian *Green Book* makes up for the paucity of diplomatic papers on the Roman question in the French *Yellow Book*. Twenty-seven despatches deal with the formation of the *Antilles Legion*, which was unquestionably a flagrant and dishonest breach of the Convention of September by France. The first is dated as far back as June 2, and the last September 7, 1867. The documents relating to the Roman question amount to 66, and come down from December 20, 1866, to December 3d of the present year. M. Rouher, in his first speech this session, glorified in the avowal that General Dumont had been specially sent from Paris to reorganize the *Antilles Legion*, as did also the Marquis de Moustier in the Senate. Moreover, they acknowledged that this body was made up of men who were actually in the French service at the time they volunteered to enter the Papal. Compare this with a note published last August in the *Moniteur* disavowing what Gen. Dumont said at Rome, and a despatch of the Italian Minister, dated the 8th of the same month, communicating a declaration of the French Government—that the *Antilles Legion* was independent of all foreign control. The Emperor's Government not only admitted that this should be so in principle but was determined to conform to it. As to M. Dumont, M. de Moustier said, "I do not disavow him; but I deny that we have anything to do with him." The Cabinet of Florence instantly expressed its complete satisfaction at the full and frank explanation vouchsafed by the Cabinet of the Tuilleries. Menebrea thanks Napoleon for his courteous assurances of friend-ship, hopes for a speedy settlement of all difficulties; and M. Rouher makes his famous speech in which he declares that Italy shall not seize on Rome.

THE CUNARD LINE—WITHDRAWAL OF THE STEAMSHIPS FROM BOSTON.—The following letter, says the *New York Times* of December 19th, is Cunard's reply to a communication from a native and citizen of Boston who, at the request of several prominent merchants of that city, has recently visited the Provinces of Canada for the purpose of ascertaining the direction in which the great volume of American produce, increasing year by year and destined for European markets, can most satisfactorily be turned in order to insure to the shippers the greatest degree of despatch:

DEAR SIR.—I have to acknowledge the receipt of your communication on the subject of trans-Atlantic transportation, from which I gather that it is the general impression that if the proper inducements had been offered by our line of steamships vast quantities of produce would have gone to Boston for shipment, which port, with the proper inducements, you say shippers would prefer to any other. I must confess I am at a loss to know what is meant by proper inducements. We do not require in New York to make arrangements in Canada, or in the Far West, for freight, and during this last autumn, when we have been sending an average of 2,500 tons of freight every week, for 10,000 tons per month, in our ships from this port, we have been unable to get 500 or 600 tons once a fortnight Boston at one-half the rate we are getting here and that was not considered sufficient inducement, as shippers in Boston complained at paying 20s. per ton when we were asking 40s. 50s. here. I think that the Boston shippers, if they wished to encourage shipments via Boston should not complain of paying half the rate of freight from New York, but we have taken freight from Boston at 5s. per ton, and even for nothing; I have ascertained also that a good deal of the little freight obtained in Boston was sent on from New York or purchased for New York account, the low rates of freight being the inducement. I do not know what Boston may be in the future as a place of shipment—I have only to deal with the present. I have received communications from Philadelphia and Baltimore clearly proving that those ports offer greater inducements for Atlantic steamers than any others. I have no doubt that the writers fully believe what they wrote, but the trade was to be built up and the experiment to be made at our expense and not theirs.

THE new bon-bon which the Paris confectioners intend introducing for the "jour de Fan," will be styled the "Chassepot," which since the late contest at Montaigu, bids fair to give the name to every novelty of Parisian origin, including bon-bons, mantes, perfumes, coiffures, new shades of color, and newly-invented dishes.

IF you wish the very best CABINET PHOTOGRAPHS, you must call on BRADLEY & RULORSON, 429 Montgomery street, San Francisco.

FRED PAYNE has removed his Cheap Shaving Shop to the opposite side of Johnson street, just above the Miner's Saloon.

THE OBJECT.—Mr Brady, a respectable resident of Lillicoet, a short time ago, received a copy of a memorial to the Governor asking for the removal of Mr Trutch. Accompanying the memorial was a letter stating that the object of the petition was to "retain the Assay Office at New Westminster by ascertaining Mr Trutch!" That's the little game, is it?

and no exception will in future be made to this rule.

The news which we publish to-day, if not of an exciting character, is at least highly interesting. A crisis in the Dominion Parliament was not unexpected, and it will be no proof of the weakness of the Government should it decide, for the sake of knitting together more closely the various provinces, to admit Mr Howe—one of the ablest statesmen in the Confederacy—to its counsels. The country would profit, no doubt, by the advice of so great and experienced a political economist as Mr Howe. We regret to observe that grave fears are expressed lest the Abyssinian expedition should not fulfil its mission this year, and that the poor captives of King Theodore will be left to pine in the dungeons of that barbarian for at least another year. We trust that the report may be contradicted and that we shall in a few days receive more cheering news from the expedition. At the interesting ceremony of presenting Mr Thornton, the new British Minister at Washington, to President Johnson, the remarks made by the latter were of an amicable character. The reply of the Minister is not given, but is believed to have been of an equally pacific character. The island of Candia would appear to be for ever lost to Turkey. Its people have voted for an annexation to Greece; the Turks have been beaten in nearly every engagement lately, and as their illiberality has alienated the hearts of the Cretans, it will be found too expensive to ram loyalty down their throats at the point of the bayonet. From Cariboo the most encouraging intelligence reaches us. Many companies are at work and the claims are rivaling in the richness of their yield the famous Steele and Cunningham claims in 1861. It is also worthy of note that a higher number of claims are being successfully worked this winter than paid expenses during the whole of 1862. The gold product of 1868 will be, immense.

Letter from Cariboo.

Cariboo, B.C., Jan'y 28, 1868.

Editor COLONIST:—Since the winter set in we have had continued and very cold weather. The first half of this month was colder than ever before known in this district. At Richfield the mercury was congealed at different times. But at the Mouth of Quesnel the cold was much more intense, the spirit thermometer indicating 58 degrees below zero. Many persons have been frozen more or less. The sleighing is capital, and now that the cold has at last succumbed to the influence of old Sol and southerly winds we are having beautiful weather, which fact is producing many smiling countenances, and the boys are going to work with hearty good will. The mines have yielded up their hidden treasure very satisfactorily during the winter months, some of the claims paying very largely. For instance, the Minchah, Willow and Ophir, on Mosquito Gulch; the Discovery and Catch-it-if-you-can, on Red Gulch; the Raby, Prince of Wales, Never Sweat, Hibernal, Australia, Welsh and Bald head, on William Creek; the Discovery, Full Big and Flume Co's on Grouse Creek; the Alterus, Floyd and Taffale on Stout's Gulch, and two or three claims on Conklin's Gulch taking out expenses. On William Creek many companies are just beginning to work—the Cariboo, two shafts; the Lillooet, one; the Sheephead, one, and the Sheep-skin one—the drain being sufficiently advanced to enable these companies to work to pretty good advantage. If the weather continues mild William Creek will give a good account before the spring freshet sets in, for which the miners are determined to be fully prepared.

Never before has living been anything like so cheap as this winter. Stocks are most abundant. In fact there does not appear likely to be a scarcity of any single article before goods are brought in again at cheap rates of freight in the summer. Flour and beef, which we were fearful would be very high, are very low, thanks to the spirit of strong opposition existing between our flour and beef speculators. Bacon and hams are quite unsaleable at a profit.

VICTORIA.

GREAT GLACIER OF NEW ZEALAND.—The Westland (England) *Observer* has an account of a visit paid recently by the chief officers of the geological department to the great glacier on the west side of Mount Cook. The foot of the glacier, which is about 13 miles from the sea, is 1,900 feet wide. Neither the glacier nor the immense field of snow which feeds it is visible from the river until within a quarter of a mile of it, when the stupendous masses of snow and ice at once break upon the view. Below the glacier a recent moraine extends for several hundred yards, consisting of the debris of the rock, 20 feet deep, underlain by ice and snow, through which considerable streams of water run, which are rendered visible in round holes, caused by the giving way of the ice and by cracks in the surface. On the southern side there has recently been a great fracture of the ice and breach of the rock, which had fallen in immense masses. The party ascended on the northern side, where the snow or ice formed rounded hills, undisturbed by any cracks or fissures. The glacier matter is porous, and presents tolerable footing; it is of a gray color, full of small dirt with occasional stones, which had evidently fallen from the surrounding hills. The great peculiarity of this glacier is not only its immense size but the consequent fact of its descending to so low a level—640 feet above the sea level—instead of ending, as is usually the case, at an altitude of some 3,000 or 4,000 feet, close to the limit of perpetual snow, among

alpine vegetation. Here the green bush extends some thousands of feet above the glacier, on the steep side of the range in which the glacier has cut the deep narrow gorge. Not a single Alpine plant rewarded the research of the party, and the temperature on the glacier was scarcely below that on the flat below. With some ceremony the party named it the Victoria Glacier. The height of the peak of Mount Cook is found to be 12,682 feet.

THE CHEMISTRY OF MEDICINE.—Among the special delights which have so richly repaid our visit to New England was the inspection, it was our privilege to make of Dr. J. C. Ayer & Co.'s Laboratory, at Lowell. Although we know by hear-say, that it was large, we were surprised when we came into view of its real magnitude and still more by the extent and aid complication of its truly immense business. The whole massive structure is in fact one vast chemical laboratory, in which the processes of this wonderful art are constantly going on. Medicinal science has found that the curative properties of any substance exist in some one or more of its component parts. Thus the remedial effects of opium are due solely to the morphine it contains, although this is but one-eighth part of its weight; the other seventeen parts are gum, extractive and inert or offensive matter. Dr. Ayer's system separates the medical properties of each substance employed and we are here shown the processes by which the virtues of each remedial agent are chased through the assemblies until they come out completely pure at last. These concentrated, purified medical properties, or virtues, are finally combined together to produce the remedies which have made themselves a reputation for unrivaled excellencies all over the world. Not only does the Doctor disclaim all secrecy in his art but explains every process by which by which the people can be supplied with the best possible remedies for the treatment of disease.—The Formula by which his remedies are made are published in the medical journals and have been presented to a large part of the medical Faculty of the United States, and are constantly sent by mail to such physicians as apply for them.—*Daily Chronicle*, San Francisco.

HOLLOWAY'S OINTMENT.—A fair trial is all that we asked to prove the sterling and superior merits of this Ointment, and to demonstrate how much more successful it is in curing old ulcers, inveterate sores, and disfiguring eruptions than any other application. When properly used it lessens the inflammation, which invades parts adjacent to the wound or ulcer, whereby much local pain is immediately assuaged, and, in the course of an hour or two, satisfactory results invariably follows, which will steadily advance to a thorough and permanent cure. This treatment so much at variance with the old-fashioned view of cauterizing, blistering, leeching, &c., has by common consent been pronounced to the greatest blessing to persons thus afflicted.

A BEAUTIFUL AND ACCOMPLISHED COUNTESS.

Of the Island of Cuba, in a letter to a friend in New York City, says: "In buying the Florida Water for me, be sure to get the Murray & Lamman's. I have tried various others, but found them much inferior in every way."

It is true that unprincipled men have counterfeited this great perfume. Therefore, buyers should always ask for the Florida Water prepared by the sole proprietors, Lanman & Kemp, New York.

Sore Eyes and Running Ears are the sure indications of serofulous blood and humor. The poison must be neutralized and purged out of the system, if you hope to be cured. No time is to be lost. Take Bristol's Sarsaparilla and Pills; they will not disappoint you. Rely upon them. Use them freely, as directed, and in a few weeks every vestige of the disease will disappear.
